

ABUBAKKAR SAJID

Full-Stack Developer | Backend Engineer | SaaS Builder

Lahore, Pakistan | +92 324 1851476 | abubakkarsajid4@gmail.com

abubakkar.dev | linkedin.com/in/mughal-abubakkar | github.com/Innocent-Developer

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building and shipping production web applications and SaaS platforms. Core expertise in JavaScript, TypeScript, React, Next.js, Node.js, Express.js, MongoDB, and Python (FastAPI). Track record of architecting scalable REST APIs, administering Linux production servers, integrating AI-powered features, and leading small engineering teams. Founded and launched multiple live SaaS products from concept through production deployment.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, GSAP, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST API Design, JWT Authentication, WebSockets, Socket.io, Stripe Billing

Databases: MongoDB, Mongoose ODM, Redis, Schema Design, Query Optimization

DevOps and Infrastructure: Git, GitHub, Docker, Linux Server Administration, Nginx, SSL/TLS, VPS Management, CI/CD, Vercel

AI and Automation: OpenAI API, Google Gemini API, Claude API, Gemini AI Vision, n8n Workflow Automation, WhatsApp Business API, Webhooks

Tools and Practices: Figma, Adobe XD, Adobe Photoshop, Agile Development, Code Review, Sprint Planning, Technical Documentation

PROFESSIONAL EXPERIENCE

Product Developer

Triad Labz (Private) Limited | Lahore, Pakistan | Hybrid | May 2026 - Present

- Engineer scalable web and mobile application features, translating complex product requirements into robust backend systems and high-performing user-facing interfaces.
- Designed and implemented information system architecture that reduced ambiguity in design-to-development handoffs and cut revision cycles.
- Build production-ready REST APIs and integrate them with frontend layers, enabling end-to-end feature delivery with minimal defects in staging.

Development Team Lead

Madadgaar Expert Partner | Lahore, Pakistan | Remote | Feb 2026 - Present

- Lead the backend and full-stack engineering team, setting technical direction, conducting code reviews, and unblocking developers on architecture decisions.
- Resolved critical infrastructure bottlenecks by restructuring deployment pipelines and VPS configurations, improving system uptime and deployment speed.
- Established coding standards and pull request review processes that reduced production bugs and improved consistency of team output.

Backend Developer and Server Administrator

Madadgaar Expert Partner | Lahore, Pakistan | Remote | Nov 2025 - Present

- Architected and maintain scalable RESTful APIs for madadgaar.com.pk, a live service marketplace connecting users with verified professional experts across Pakistan.
- Designed and optimized MongoDB schemas and query patterns, improving response times on high-traffic endpoints by eliminating unindexed collection scans.
- Administer Linux VPS infrastructure including Nginx reverse proxy configuration, SSL/TLS setup, security hardening, and automated deployment pipelines, maintaining stable uptime under live production traffic.
- Implemented real-time WebSocket features for in-app notifications and user-expert messaging, removing client-side polling and reducing server load.
- Deliver consistent API contracts across web, Android, and iOS clients, cutting integration errors reported by the mobile team.
- Enforce security best practices including input validation, rate limiting, and JWT token management across all service layers.

Product Manager (Part-time)

Code-XA Official | Punjab, Pakistan | Mar 2026 - Present

- Own product roadmap planning and sprint execution for agency projects, bridging client requirements and the engineering team.
- Defined feature prioritization frameworks that reduced scope creep and improved on-time delivery across active projects.
- Led internal process improvements covering project tracking, communication, and code review standards.

Full Stack Engineer (Contract)

Code-XA Official | Punjab, Pakistan | Hybrid | Jan 2025 - Present

- Build and ship full-stack client applications using React, Node.js, and modern JavaScript frameworks, delivering production-ready features on tight deadlines.
- Developed responsive interfaces focused on performance and usability, reducing client-reported page load issues by optimizing component rendering and asset delivery.
- Architected and integrated backend services and REST APIs for end-to-end product functionality across multiple client projects.
- Manage project pipelines and client communication across concurrent engagements.

Backend Developer

Echo Reads (Private) Limited | Lahore, Pakistan | Contract | Jul 2025 - Jan 2026

- Developed and maintained backend systems using Node.js, Express.js, MongoDB, and TypeScript for a content platform, delivering clean API contracts for frontend consumption.
- Built and documented platform APIs covering user management, content delivery, and engagement tracking.
- Worked closely with frontend engineers to improve data flow, reduce over-fetching, and align API responses to UI requirements.

Full Stack Web Developer

MI-Networks | Pakistan | Full-time | 2024 - 2025

- Led development of client-facing web applications using React, Node.js, Express.js, and MongoDB, owning features from design handoff to production deployment.
- Built JWT authentication and role-based access control systems securing multi-role platforms in production use.
- Optimized database queries and API response structures, reducing average response times across high-traffic routes.
- Managed staging and production environments with automated deployment workflows, reducing manual deployment errors.

Full Stack Web Developer (Internship)

Onestwork | Pakistan | 2023 - 2024

- Developed web applications across frontend (React) and backend (Node.js, Express.js) layers, gaining end-to-end product development experience.
- Integrated third-party APIs including payment gateways and email services into client projects, delivering complete user-facing workflows.

Frontend Developer (Internship)

Jalsonic Networks | Lahore, Pakistan | On-site | Apr 2022 - Mar 2023

- Built responsive web interfaces from UI/UX mockups using HTML, CSS, JavaScript, and React, delivering pixel-accurate implementations.
- Improved page performance through lazy loading, code splitting, and image optimization, reducing initial load times on client projects.

KEY PROJECTS

API Test Lab | apitestlab.org

Tech Stack: Next.js, FastAPI, MongoDB, Stripe

- Built a full SaaS platform for API testing, load testing, and real-time traffic monitoring from scratch, handling product, design, and engineering solo.
- Developed a multi-endpoint concurrent testing engine with response analytics and historical comparisons, giving teams visibility into API performance regressions.
- Integrated Stripe subscription billing with tiered access plans and usage-based tracking, enabling monetization from launch.

Cost Segregation Tax Calculator | github.com/Innocent-Developer/costsegregation

Tech Stack: React (Vite), FastAPI, MongoDB, Google Gemini AI

- Built an AI-powered SaaS for U.S. commercial property tax depreciation analysis under IRS guidelines, meeting real compliance requirements.
- Integrated Gemini 2.5 Flash AI vision to detect and classify building components from property images, replacing manual component identification.
- Implemented an RS Means cost engine with a top-down constrained allocation model anchored to improvement basis for IRS-compliant depreciation schedules.
- Designed a batched image processing pipeline with Roboflow pre-detection, improving classification accuracy on complex multi-structure properties.

ForiSay - AI WhatsApp Sales Chatbot | forisay.com

Tech Stack: Node.js, WhatsApp Business API, OpenAI and Gemini APIs, MongoDB, Webhooks

- Built an AI-powered WhatsApp chatbot that auto-replies to customer messages 24/7, eliminating missed leads for businesses operating on WhatsApp.
- Integrated the WhatsApp Business API via webhooks to process incoming messages in real time, with AI generating context-aware replies from business-specific training data.
- Designed for high-volume use cases including e-commerce order queries, real estate property inquiries, and service-based lead capture, where response delay directly costs sales.
- Implemented lead capture and conversation logging in MongoDB, giving business owners full visibility into every customer interaction and follow-up opportunity.

AI-Powered Automation Workflows

Tech Stack: n8n, OpenAI API, Webhooks

- Designed automated workflows in n8n for lead capture, email sequences, and cross-platform data sync, replacing manual operational tasks.
- Integrated AI APIs for automated content generation, data extraction, and smart routing across multiple client use cases.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Lahore Leads University | Lahore, Pakistan | Sep 2024 - Present (Expected 2028)

CERTIFICATIONS

- Certified Full-Stack Web Application Development
- Certified Cyber Security
- Certified AI Engineer and Automation
